Who We Treat

Medicare Patients

If your GP has provided you with a Chronic Disease Management Plan, please bring your referral to us — there is no out-of-pocket cost for eligible sessions.

Private Patients

You don't need a referral—affordable fees with concession rates available for eligible patients.

WorkCover / CTP Patients

We treat injuries resulting from workplace and motor vehicle accidents. Bring your claim number and GP referral to get started.

How to Refer

Visit your GP and request a Chronic Disease Management Plan (CDM). Your GP will issue a referral for physiotherapy.

Book your appointment with us and bring your referral on the day — we'll take care of the rest.

Why Refer To Us? **Physiotherapy**

- We provide **detailed progress reports** to all referring doctors to ensure **clear communication** regarding their patients' treatment.
- Our reports are structured to give GPs insight into **clinical findings, functional outcomes**, and ongoing **rehabilitation needs**.
- We play an **active role** in supporting the patient's broader health journey—whether it involves directing them back to their GP for review or recommending onward referral to a specialist.
- Our focus is on maintaining **professional, collaborative communication** to ensure each patient receives **coordinated, high-quality care**.

Support your patients in achieving optimal movement,
strength & independence
